

CSI Senior Core Team 2022-2023 Anniversary

Event: A celebration event held in honour of the CSI senior team's one-year anniversary of joining CSI.

Date: 17/03/2023

Time: 1:00 Pm to 5:00 Pm

Location: Bosco Hall, 2nd Floor, A Wing, DBIT, Kurla.

Conducted by: CSI Team

Coordinator: IT Faculty & CSI Team, DBIT

About Our Event:

Brief description:

The event was held to celebrate the senior CSI core team's first anniversary. For the academic year 2022–2023, Prof. Nilesh Sir announced the CSI core team last year on this day. The event features a recognition of the CSI team for the work they did to grow CSI, some advice from faculty and the junior core to improve CSI, and lots of entertaining activities.

Category: Non-Technical

Number of people who participated: 35

Reasons why we chose this event:

The goal of holding this event was to celebrate the senior team's one-year anniversary, gather suggestions from everyone on how to improve CSI, plan future events, and have fun while doing so.

How was it conducted?

The event began at 1:15 PM. The event's hosts were S.Vendra and Suhani Desale. They took everyone on a tour of CSI's past. began by mentioning that the CSI team was introduced on this day, March 17, the previous year. The host informed everyone that the team's first-ever Csi event was the Mumbai Hackathon. The host gave an explanation of the event's operations and its success. The entire CSI team participated in the Mumbai Hackathon under Prof. Janhavi's supervision and Prof Sunantha's for publicity. By visiting each

university in person to advertise the event both offline and online, they were able to get 97 participants. The hosts also discussed with the audience the three Projects that were successfully carried out under CSI.

Other than Mumbai Hackathon, the senior CSI core team organized several similarly successful events including the FE induction meet, GitHub workshop, engineers day, predict the output on Instagram, Express JS for TE students, FE induction for upcoming first-year students, web development workshop, node up your creativity, and the 100-day coding challenge, among other events. Few people attended the Csi flix event which was the movie screening of the Netflix documentary "Social Dilemma," which was a little less successful, but the team nonetheless handled the event with grace and learned from their missteps.

The entire Csi team was then addressed by Prof. Prasad Padhalkar, and the faculty members in attendance offered suggestions for improving Csi and conducting some events. Following cake cutting and lunch distribution, the event was concluded with games like scribble who knows who and other enjoyable activities hosted by Simar Kaur

Time commitment: 4 hrs.
